To Supt Brandon A motion was made by farren Jackson to make a new Migh School grad e for Colored workx School which was voted on without any opposition . There being no further business the board adjourned . Signed ... 3. Put South

Secty. .

The Board of Education City of Cartersville met at the City Hall at 8 P.M.
Kembers present John Fowler Chairman, Bert Smith, Glenn Williamson.

A motion was made by Bert Smith and second by Glenn Williamson recommending to City Council that Board of Education accept plans for Douglas St School addition. Vote unanimous by members present. A motion was made by Glenn Williamson and second by Bert Smith that The Board recommends to the City Council two two rooms be added to the woodwork shop and two rooms in the main building to be expanded and all buildings be put in repair good repair, such as roof repair and sainting to preserve the buildings, at the Summers Hill School. In view of the fact tak that the colored people at have raised among themselves over \$1300.00 to build a gymnasium building at the Summers Hill School and pursuant to request by man the Summers Hill School to the Board of Education for assistance to finish the building, The Board of Education recommends that the City match such money as may be raised by them - not to exceed \$ 2000.00 for the City's part to enable them to finish the gymnasium . A motion was made by Glenn Williamson and second by Bert Smith that the Board recommends to City Council That present high school building beroof and guttering be put in good condition and that other necessary repairs and painting be done to the building to put it in good repair as soon as passiblex practicle. Vote unanimous by members present. A motion was made by Bert Smith and second by Glenn Villiamson that after considerable discussion and investigation by members of the Board and after considering looking foward to some growth in the City of Cartersville and after considering the greatly increased birth rate in the community as well as nationally, the Board feels that the present High School building will shortly be inadequate and out of keeping with the community and with cities around us The School Board unanimously recommends that the City Council give thought and consideration to the need of a new high school building, and that ifxibexxeenxemexiexxxexxeexx auditorium in such building and that if they can see their way clear , that an architect be employed to draw plans and specifications to be considered . The School Board fully realized the high cost of building today, but at the same time 'e wish to you that interest rates are the cheapest in the history of the nation . Just to illustrate the difference in the cost of interest now as against the cost of interest when school bonds were last issued by the City at 5 % rate and the belief that bonds might be issued at the present at a rate of interest not exceeding 1 3/4 % . We believe that the interest savings at these low rates would to a large measure off set the increased cost of building and would provide necessary additional school facilities in time to meet the growing requirements .

For illustration, based on \$100,000 (This is an illustration only. We have no idea of the cost of the buildings) At a rate of 5%, interest cost would be \$5000 a year. The same rate \$100,000 at a rate of 1-3% would be \$1,750 a year - or a savings in interest yearly of \$3,250. So it may be seen readily that the cost of a bond issue amortized over a period of 20 years can be arranged at a very low interest rate, which would to a large extent offset the increased cost of building.

Cur thought in connection with the old unknown high school suilding is that it be kept in good repair and it be utilized for band practice (which at present is most disturbing to the class rooms) and that woodworking and other manual arts be moved into the old building, and the remaining rooms be reserved as a possible reserve space should the grammar school need.
